 ashaq.info

I am a software engineer that has skills in both the back end of web applications and the front-end. I not only want to use my design skills to make the application look beautiful, but I also want to work on the technically challenging facets of the application too. At my ideal company, I would work with team that follows best practices like Test Driven Development and pair programming to help me learn and grow as a developer.

EXPERIENCE

2020 Nov – Current

Software Developer / General Assembly

Completed a 24-week software Engineering immersive course. Completed projects which includes HTML, CSS, JavaScript, Git, GitHub, DOM manipulation, responsive design, Ruby, Ruby on Rails, Agile, SQL, Bootstrap, React, jQuery, Node.js, AJAX, OOP, BDD, API's and more. And Completed projects which can be seen at GitHub.
